Seeking full-time Christchurch or NZ-remote work

PROFILE

Christchurch-based web developer with commercial experience delivering WordPress and CMS websites for education-sector clients across New Zealand and Australia. I work across UI implementation, responsive front-end development, CMS integrations, QA, migrations, launch support and live-site troubleshooting. My progression from student intern to technical support and website development has built a practical mix of design judgement, implementation skill and clear client-facing communication.

CORE SKILLS

Front-end implementation HTML, CSS, JavaScript, PHP, React and TypeScript; responsive layouts, reusable patterns and accessibility.	WordPress and CMS WordPress, Gutenberg, Divi, Elementor, Avada, Hail CMS, content feeds and maintainable publishing workflows.
UI and design Figma, responsive systems, information architecture, interaction quality and translating brand requirements into interfaces.	Delivery and support Git, QA, Cloudways, LocalWP, WP-CLI, DNS, migrations, launch support, debugging and technical documentation.

EXPERIENCE

HAIL - YOUR COMMUNICATIONS PARTNER Website Developer

Sep 2025 - Present | Full-time

- Deliver responsive WordPress and CMS websites for schools across New Zealand and Australia, carrying work from layout direction through implementation, QA and launch support.
- Translate brand, content and UX requirements into reusable Gutenberg, Divi, Elementor and Avada layouts that remain practical for client content teams.
- Integrate Hail CMS articles, publications and feeds into WordPress, creating maintainable display patterns for ongoing publishing.
- Manage staging, Cloudways migrations, DNS checks, caching and post-launch fixes to reduce launch risk and keep live sites dependable.
- Diagnose plugin, form, SMTP, SEO, browser and device issues, then document repeatable fixes and QA checks for future delivery.

HAIL - YOUR COMMUNICATIONS PARTNER Technical Support

Feb 2025 - Aug 2025 | Full-time

- Managed frontline support for Hail CMS and WordPress clients, turning reported issues into clear reproduction steps and development follow-up.
- Identified root causes across content, plugins, domains, email, CMS configuration and publishing workflows in live client environments.
- Converted recurring support problems into documented fixes, QA checks and stronger implementation practices.

EXPERIENCE CONTINUED

HAIL - YOUR COMMUNICATIONS PARTNER

Student Intern

Aug 2024 - Jan 2025 | Internship

- Researched international school apps and built a competitor matrix to identify product gaps and opportunities.
- Evaluated mobile frameworks, selected React Native with Expo and built a functional prototype.
- Worked with stakeholders to refine concepts and present findings that helped shape the direction of Hail's mobile app.

SELECTED PROJECTS

BeWriteBack - privacy-first clipboard PWA

[Case study](#) | [Source](#)

Designed and developed a responsive React and TypeScript application for saving and recalling reusable text without accounts, analytics or a back end.

Evidence: Local persistence, folders, favourites, search, sorting, drag-and-drop, keyboard interaction, installation and offline PWA support.

Jamie Wilson portfolio

[Live](#) | [Source](#)

Built a responsive personal portfolio that combines recruiter-focused content with custom motion and a progressively enhanced Three.js laptop experience.

Evidence: Semantic HTML, modular JavaScript and CSS, theme persistence, reduced-motion support, structured data, Playwright tests, axe accessibility checks and GitHub Actions CI.

EDUCATION

Bachelor of Information and Communication Technologies

Completed 2025

Software Development | Ara Institute of Canterbury

Diploma in Web Development and Design

Completed 2022

Ara Institute of Canterbury

Certificate in Information Technology Essentials

Completed 2020

Ara Institute of Canterbury
